

FIREBIRD SPARE PART NOTIFICATION

**TBB & AAM REPLACEMENT THERMOSTATS FOR 1984 TO
2003 SUPER Q BOILERS ARE NO LONGER AVAILABLE**

Unfortunately, Firebird can no longer provide replacement TBB and AAM limit thermostats for the Super Q Boilers (1984 to 2003 manufacturer dates).

The manufacturer of the thermostat closed this factory in 2008. Firebird bought a huge stock of the thermostats for the spare parts in 2008, but these are now all gone. We have been unable to find a suitable alternative thermostat or solution.

Most of these Super Q boilers with these thermostats are around 20 years old. The Firebird Enviromax High Efficiency Condensing boilers are an excellent upgrade, improving efficiency by up to 25% and saving money.

We are sorry for the inconvenience this causes, but the matter is outside our control.
